 shashank-poola

Summary

Full Stack Developer from India with hands-on experience taking products from 0→100. I love building fast, reliable, user-focused web applications and thrive. Strong in both frontend and backend, with a focus on clean architecture and practical execution.

Projects

TradeX - Crypto Trading Platform ⧉ *Aug 2025 - Sep 2025*

- This trading platform that allows users to trade BTC, SOL, and ETH, with long/short, which includes leverage, slippage, live PnL, stoploss.
- Trading engine using Redis Streams for order processing and WebSockets for live market and display candles.
- **Tech Used:** TypeScript, Express.js, React JS, Redis pub/sub, Streams, Prisma, Postgresql, WebSockets, Turbo repo, Docker. DigitalOcean

Rivet(n8n) - AI-Automation Tools Platform ⧉ *June 2025 - Aug 2025*

- Developed AI automation tool allowing users to build custom workflows by connecting various APIs and services through node editor using ReactFlow.
- Implement nodes types like Mail service, Telegram bot, AI tools (Gemini, Grok), and manual trigger.
- **Tech Used:** React js, Node.js/Express, Typescript, ReactFlow, Postgresql, Prisma, Docker, Vercel, Gemini, Grok, Resend.

Pluto.market - Prediction market Platform (In Progress) ⧉ *Nov 2025 - Now*

- A prediction market platform where users trade on internally created markets using a demo balance while browsing real-time external markets from Polymarket.
- Includes categories like Politics, Crypto, Entertainment, and News, supported by a custom trading engine, vault system, and a worker for continuous external market synchronization.
- **Tech Used:** React JS, Typescript, Next JS, Express JS, Redis Pub/Sub, Tailwindcss, Prisma, JWT, zod, Postgresql, Prisma, Docker

Freelance

Monex Builders - Full stack Application *Feb 2025 - Mar 2025*

- Built full-scale web application using React.js and Express.js, includes Admin panel and mutliple pages with authentication.
- Designed UI/UX in Figma and executed across all page components with seamless user experience.

Technologies

Frontend: Typescript, Javascript, React JS, Next JS, TailwindCSS, Framer motion, GSAP

Backend: Node JS, Express JS, Axum, Zod, JWT, Bcrypt, WebSocket, Redis streams, Pub/sub, PostgreSQL, MongoDB, Prisma,

Web3 & Blockchain: Rust, Web3 JS, Solana, Anchor

Tools & DevOps: Git, GitHub, Docker, Turborepo, Vercel

Education

Bharat institute of engineering and technology *2022 – 2025*
B.tech in Computer Science(AIML)
